

# Shine Activity Mapping with eeHelps

Evangelism Explosion's free mobile app

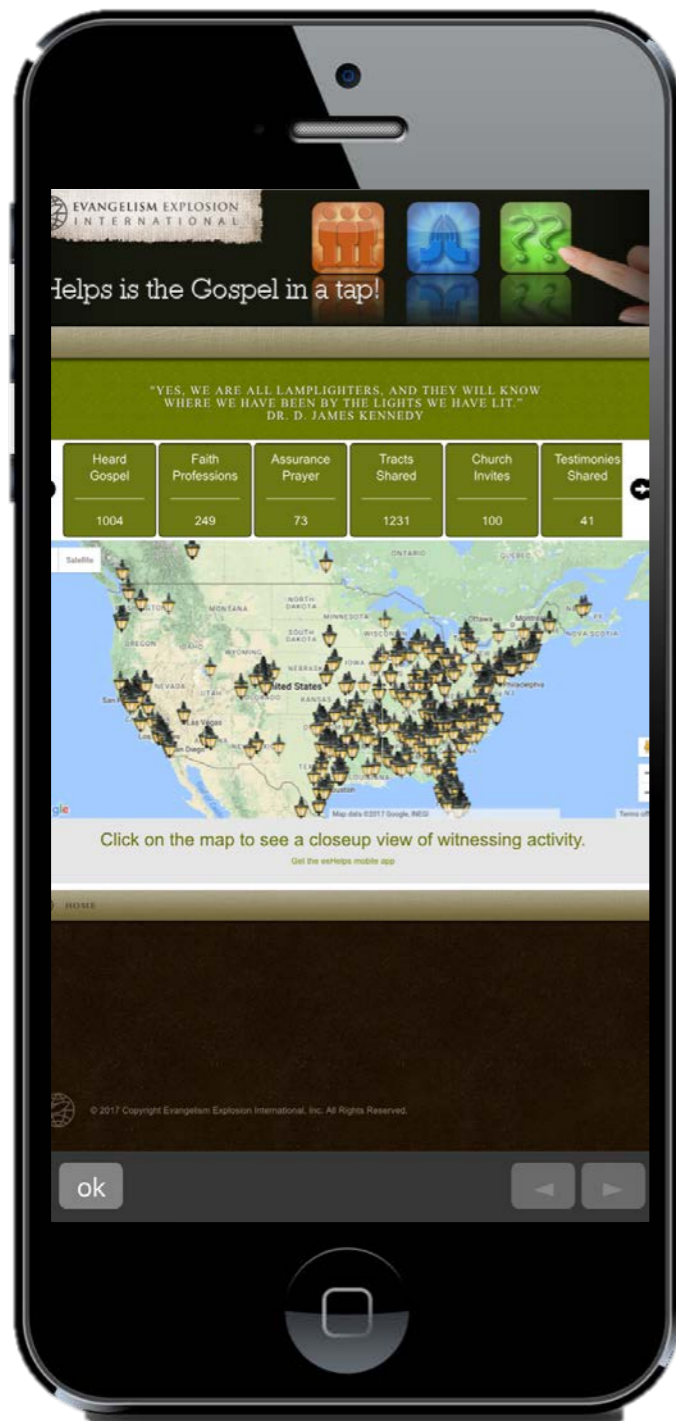

“Yes, we are all Lamplighters, and they will know where we have been by the lights we have lit.”

Dr. D. James Kennedy

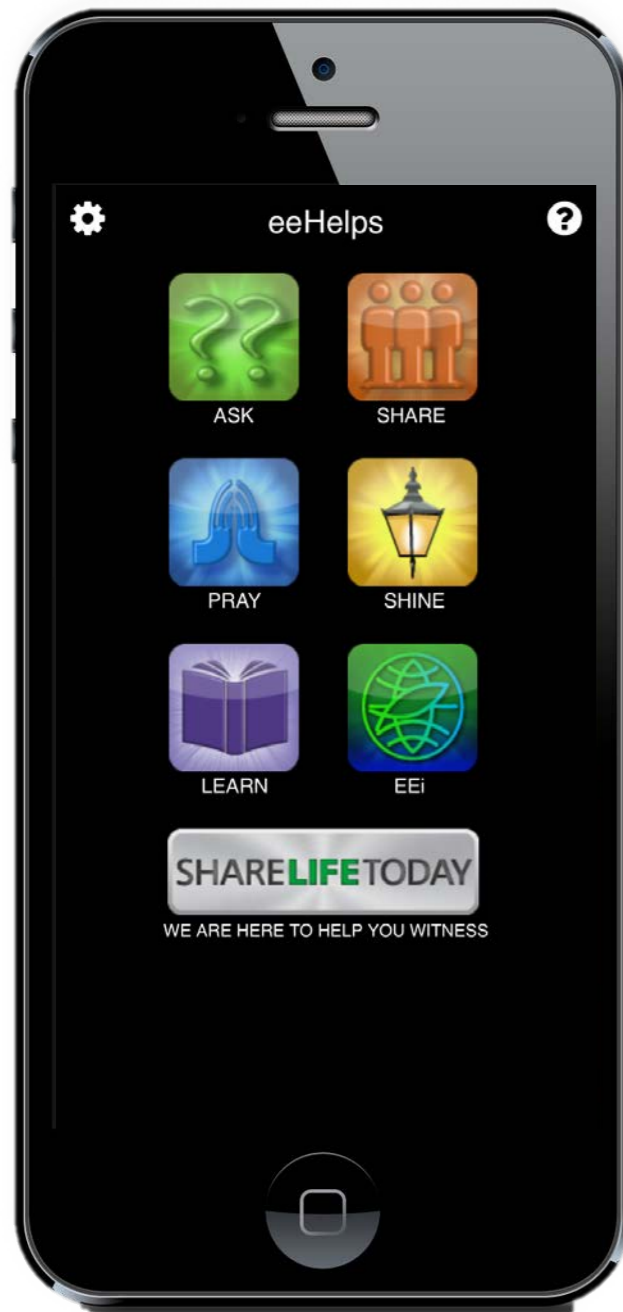

# Shine Activity Map Explained

- If users grant eeHelps app access to location information\*
- Lanterns are lit at the phone's location during the event (regardless of when the email report is sent)
- If users do not allow eeHelps access to location information, all Lanterns are lit just off the coast of Fort Lauderdale, FL (where EE started)
- Currently we are only able to show global activity of all users.

\*granting use of location information is selected when prompted or in Phone Settings \ Privacy\ Security \ Location Information depending on your phone

# Shine Future Features

- We are planning future features for Shine that include:
  - Individual Church Views (with sub-views of groups within a Church)
  - Individual User Views (with views of different groups user belongs to)
  - Country, State, City, Zip views
  - Event Type views
  - Witnessing History, Reminders, Encouragements
- We welcome your ideas:
  - What would be helpful for your church?
  - What would encourage your people to be more active witnesses?
- Press the ? at the top right, Contact Us and send in your ideas.
